## REVIEW TESTING SECURITY POLICIES

All contest testing information, questions, answers, figures, images and any other material should not be transmitted or reproduced by any student, advisor or SkillsUSA state director. The testing platform employs the following measures to ensure that testing material remains confidential and secure:

### Right Clicking is Disabled

No test-taker will have the ability to copy, paste, print or perform any other “right click” function while taking a contest assessment.

### Tab/Window Switching is Disabled

During the assessment, students may **NOT** switch tabs or browser windows.

Switching tabs or browser windows will automatically submit your test in its current state. **NO RETAKES WILL BE ALLOWED**

### Questions and Answers are Randomized

Questions and answers are randomized within each assessment and appear different for each user. If you have a inquiry about a specific question, please reference the question instead of the question number.
